

Job Title: Lecturer in Space Computing (Teaching and Research)
Grade: 8
Salary: £44,263 to £54,395 per annum
Department: Computing and Mathematical Sciences
Hours/Contract: Full time or job share considered, Permanent
Job Family: Teaching and Research
Reference: 9637

Role Purpose

To conduct high-level innovative research and teaching in Computer Science including the publication of research, development of teaching materials, research supervision and generation of research income and/or real-world research impact through research grants, consultancy, and/or knowledge transfer.

To contribute to the growing collaboration between the School of Computing and Mathematical Sciences and Space-related research at the University of Leicester, building links with Space Park Leicester, the Institute for Space, National Centre for Earth Observation, inter alia.

Main Duties and Responsibilities

Research

- Engage in personal and collaborative research in Computer Science with a focus on Space applications, resulting in significant contributions to papers in leading international conferences and journals
- Generate external funding through grants, consultancy, knowledge-transfer activities, or other sources to support research and its transition into applications.
- Help develop research strategies enabling the School to attain its goal of developing interdisciplinary Space-related activities at the University of Leicester.
- Build up and maintain relationships with external partners to support knowledge transfer and impact outside academia.
- Supervise research students and provide advice and guidance to other members of the wider team, both research staff and students.
- Attend major international and national conferences in the area of and present research results on a regular basis, and to network and contribute to personal recognition and that of the University.

Teaching

- Give lectures, seminars, tutorials and other classes in a variety of Computer Science subjects as allocated by the Head of School based upon the School's teaching obligations.
- To co-operate with colleagues in the review and development of the curriculum and in the design and launch of new degrees or other academic awards where appropriate.
- Supervise project work by undergraduate and postgraduate students in Computer Science.

- Maintain a broad and up-to-date knowledge of research and scholarship in core areas of Computer Science to ensure that teaching meets the standards expected within a research-led University.
- Undertake other academic duties (such as setting and marking coursework and examination papers, invigilation, participation in course reviews and pastoral support of students) required to sustain the delivery of high-quality teaching.
- Support and comply with the University and School’s teaching quality assurance standards and procedures, including the provision of such information as may be required by the School or the University.

Administration and Other Activities

- Undertake such specific school’s roles and management functions as may be required by the Head of School.
- Attend School’s meetings and participate in committees and working groups within the School, the College and the University to which appointed or elected.
- Engage in continuous professional development, for example through participation in relevant staff development programmes.
- Undertake, subject to the agreement of the Head of School and the University as appropriate, external commitments that reflect well upon and enhance the reputation of the University.
- Ensure compliance with health and safety requirements in all aspects of work.
- Take responsibility for organising resources and effective decision making in support of research and teaching.

Internal and External Relationships

Collaborate with colleagues in the School and the University at large with interests in Space applications and technologies including those in Space Park Leicester, the Institute for Space, the National Centre for Earth Observation and other administrative units of the University, as well as research groups nationally and internationally. Support research students and other staff members to provide advice and guidance in area of expertise. Build and maintain contacts with healthcare providers, industry or other external partners and work with them on joint projects.

Planning and Organising

Plan and deliver a course of lectures to undergraduate, masters, or PhD students. Plan research grant applications, publication of high-quality papers, industry engagements and impact-bearing collaborations.

Qualifications, Knowledge and Experience

Essential

- A PhD or equivalent in computer science or a cognate discipline. *
- Experience or potential in one or more of the following areas is desirable, all in the context of applications to Space Engineering, Earth Observation or other related areas:

- Software development, testing and quality assurance
- AI, Data Science and Predictive Analytics
- Digital Twins
- Autonomous Systems and Autonomous Control, including Positioning, Navigation, and Timing (PNT), Guidance, Navigation, and Control (GNC) etc.
- In-space Servicing, Manufacturing, and Processing.
- Evidence of research leading internationally in terms of originality, significance and rigour, that are consistent with the School that is aspiring to achieve the highest standards of excellence as evidenced by*
 - Track record of publication of high-quality research papers *
 - Evidence of potential to engage in high-quality and impactful collaborative research, knowledge-transfer activities or consultancy with research in space or the space industry*
- Evidence of potential to engage in interdisciplinary research with other departments/schools and colleges*
- Experience or knowledge of higher education and ability to use a range of delivery techniques to inspire and engage students*
- Demonstrated ability or potential to generate external funding (through research grants, contracts and other sources) to support research programmes*
- Academic Teaching Qualification or commitment to gain the appropriate category of HEA Fellowship.

Desirable

- Evidence of collaborative research with leading space research groups or companies in the space sector in the UK or abroad.
- Experience in organising seminars, workshops, conferences or other research meetings.
- Experience in supervision of undergraduate or postgraduate students.

Skills, Abilities and Competencies

Essential

- High level of proficiency in English, sufficient to undertake research, teaching and administrative activities utilising English Language materials and to communicate effectively with staff and students.
- Proven ability or potential to generate external funding through research grants, consultancy, knowledge-transfer activities, or other sources to support research and its transition into applications.
- Proven ability or potential to initiate work independently and as part of a team, both on research and teaching programmes.

- Proven ability or potential to teach undergraduate and postgraduate students in lectures, tutorials and seminars, and to supervise postgraduate students.
- Ability to teach and supervise undergraduate and postgraduate students in applied areas of computer science, including *:
 - Artificial Intelligence and Machine Learning
 - Cloud and Distributed computing
 - Databases
 - Programming Languages
 - Software Engineering
 - Software System Security
- Good interpersonal and personal skills and traits including:
 - Selflessly balancing the needs of colleagues the organisation against your personal goals
 - Time management and prioritisation
 - Commitment to accountability, integrity, and trustworthiness
 - Ability to work in teams and to be able to balance organization and personal goals
 - Having a solution-focussed and problem-solving mentality
- Ability or potential to help develop curricula.
- Ability or potential to engage in outreach activities.
- Good written* and oral communication skills, along with presentation and training skills.

Desirable

- Ability to collaborate with existing staff in the School of Computing and Mathematics

****Criteria to be used in shortlisting candidates for interview***

Criminal Declaration

If you become an employee, you must inform your manager immediately, in writing, if you are the subject of any current or future police investigations/legal proceedings, which could result in a criminal offence, conviction, caution, bind-over or charges, or warnings.

Supporting University Activities

As a University of Leicester citizen, you are expected to support key university activities such as clearing, graduation ceremonies, student registration and recruitment open days. We expect all staff as citizens to work flexibly across the University if required.

University Values

Inclusive - We are diverse in our makeup and united in ambition. Our diversity is our strength and makes our community stronger.

Inspiring - We are passionate about inspiring individuals to succeed and realise their ambitions. We challenge our community to think differently, to get involved, and to constantly embrace new ideas.

Impactful - As Citizens of Change we will generate new ideas which deliver impact and empower our community

Equity and Diversity

We believe that equity, diversity and inclusion is integral to a successful modern workplace. By developing and implementing policies and systems that challenge stereotypes across all aspects of our work, we have a culture that recognises and values the diverse contributions of our staff which benefits everyone. Our strong values of inclusivity and equity support our efforts to attract a diverse range of high quality staff and students, and identify our University as a progressive and innovative workplace that mainstreams equity, diversity and inclusion.
