Job Title: Health and Safety Business Partner (Projects and Planning)
Grade: 8
Salary: £43,267 to £48,677 per annum
Department: Projects and Planning, Estates and Campus Services
Hours/Contract: Permanent, Full time
Reference: 915

Role Purpose

In alignment with our new structure for the provision of health and safety management advice in the University, we have established the role of Health and Safety Business Partner to support relevant senior leadership teams and ensure they have access to the requisite competence to assist them in discharging their health and safety obligations. Focused on delivering value and service, the business partner role is key to ensuring the University health and safety strategy is supported in the context of the key activities and risks within colleges and departments.

In this context, the business partners are responsible for managing the relationship with key stakeholders and for identifying, shaping and managing how health and safety is delivered in the areas for which they have responsibility.

This is a highly visible and influential position within the health and safety team and the role holder is expected to effectively act as both an advocate of the ‘customer’ into the health and safety function and an advocate of health and safety back to the ‘customer’.

Typical activities that the role holder can expect to engage in include:

- Managing assigned areas for which they have responsibility, managing associated relationships, focusing on improving health and safety service delivery and aligning departmental stakeholder expectations with those of the University’s health and safety strategy
- Providing health and safety competent person resource to the senior leadership team within the areas for which they have responsibility
- Identifying, validating and shaping health and safety management system requirements
- Providing University stakeholders with insight & feedback to better inform our actions and decisions
- Establishing themselves as a trusted advisor to stakeholders so that they are able to understand and align with key technology related strategies and appreciate opportunities to exploit technology capabilities & innovation
- Escalating performance issues on behalf of stakeholders where the areas for which they have responsibility are failing to meet their health and safety obligations; ensuring that stakeholders understand their responsibilities
- Work collaboratively with the Occupational Health team, where the health and wellbeing of members of staff may be affected by safety issues, to ensure that health concerns are recorded and managed appropriately.
- Work with managers to undertake workplace measurements to inform the University Health Surveillance requirements, and ensure that these are communicated to Occupational Health.
### Job Summary

<table>
<thead>
<tr>
<th>Main Duties and Responsibilities</th>
